Forensic Science International, 53 (1992) 237–238
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 53 (1992)

acid phosphatase test, semen, zinc test, comparison, testing strategy, 135
alcohol consumption, drug consumption, drivers, road safety, Spain, 221
alveolar type II cells, pulmonary surfactant, immunohistochemistry, fetal age, 193
antemortem consumption, military aircraft fatalities, carbon monoxide saturation, postmortem formation, 143

brain tissue, high-flow solid-phase extraction, cocaine, HPLC, 215
bupivacaine, human plasma, single-step extraction, *n*-hexane, gas chromatography, packed column, pharmacokinetic study, 125

carbon monoxide saturation, military aircraft fatalities, postmortem formation, antemortem consumption, 143
child abuse, child neglect, thymus gland, thymic involution, stress, T lymphocytes, immunohistochemistry, 69
child destruction, infanticide, separate existence, flotation test, coronial jurisdiction, 1
child neglect, child abuse, thymus gland, thymic involution, stress, T lymphocytes, immunohistochemistry, 69
chlorophyll(a) of planktons, drowning, spectrofluorophotometer, 149
cocaine, high-flow solid-phase extraction, brain tissue, HPLC, 215
comparison, semen, zinc test, acid phosphatase test, testing strategy, 135
computer crimes, questioned documents, thin layer chromatography, 51
contamination problem, identification techniques, hypervariable simple repeat loci, 163
coronial jurisdiction, infanticide, child destruction, separate existence, flotation test, 1

database, DNA profiling, statistics, 45
DNA, single locus probes, measurement variation, 173
DNA profiling, statistics, database, 45
documentation, torture, medical participation, validity assessment, 97
drivers, alcohol consumption, drug consumption, road safety, Spain, 221
drowning, chlorophyll(a) of planktons, spectrofluorophotometer, 149
drug consumption, alcohol consumption, drivers, road safety, Spain, 221

EDNAP, single locus probes, sizing, interlaboratory comparisons, 29
electrical resistance, postmortem interval, resistance, stomach, gastric wall, 81

fetal age, alveolar type II cells, pulmonary surfactant, immunohistochemistry, 193
fiber tip pens, signatures, writing characteristics, 157
flotation test, infanticide, child destruction, separate existence, coronial jurisdiction, 1

gas chromatography, bupivacaine, human plasma, single-step extraction, *n*-hexane, packed column, pharmacokinetic study, 125
gastric wall, postmortem interval, electrical resistance, resistance, stomach, 81

high-flow solid-phase extraction, cocaine, brain tissue, HPLC, 215
HPLC, high-flow solid-phase extraction, cocaine, brain tissue, 215
human plasma, bupivacaine, single-step extraction, *n*-hexane, gas chromatography, packed column, pharmacokinetic study, 125
hypertrophy of the palatine tonsil, sudden infant death syndrome, sleep apnea, 93
hypervariable simple repeat loci, identification techniques, contamination problem, 163

identification techniques, hypervariable simple repeat loci, contamination problem, 163
immunohistochemistry, alveolar type II cells, pulmonary surfactant, fetal age, 193
immunohistochemistry, child abuse, child neglect, thymus gland, thymic involution, stress, T lymphocytes, 69
infanticide, child destruction, separate existence, flotation test, coronial jurisdiction, 1

interlaboratory comparisons, EDNAP, single locus probes, sizing, 29

measurement variation, DNA, single locus probes, 173
medical participation, torture, validity assessment, documentation, 97
microspectrophotometer, nonspecific esterase, timing of wounds, 203
military aircraft fatalities, carbon monoxide saturation, postmortem formation, antemortem consumption, 143

n-hexane, bupivacaine, human plasma, single-step extraction, gas chromatography, packed column, pharmacokinetic study, 125
nonspecific esterase, microspectrophotometer, timing of wounds, 203

packed column, bupivacaine, human plasma, single-step extraction, *n*-hexane, gas chromatography, pharmacokinetic study, 125
persumptive test, semen, zinc, test papers, 131
pharmacokinetic study, bupivacaine, human plasma, single-step extraction, *n*-hexane, gas chromatography, packed column, 125
posterior inferior cerebellar artery anatomy, trauma, posterior inferior cerebellar artery rupture, subarachnoid haemorrhage, 61
posterior inferior cerebellar artery rupture, trauma, posterior inferior cerebellar artery anatomy, subarachnoid haemorrhage, 61
postmortem formation, military aircraft fatalities, carbon monoxide saturation, antemortem consumption, 143
postmortem interval, electrical resistance, resistance, stomach, gastric wall, 81
pulmonary surfactant, alveolar type II cells, immunohistochemistry, fetal age, 193

questioned documents, computer crimes, thin layer chromatography, 51

resistance, postmortem interval, electrical resistance, stomach, gastric wall, 81
road safety, alcohol consumption, drug consumption, drivers, Spain, 221

semen, persumptive test, zinc, test papers, 131
semen, zinc test, acid phosphatase test, comparison, testing strategy, 135
separate existence, infanticide, child destruction, flotation test, coronial jurisdiction, 1
sudden infant death syndrome, hypertrophy of the palatine tonsil, sleep apnea, 93
signatures, fiber tip pens, writing characteristics, 157
single locus probes, DNA, measurement variation, 173
single locus probes, EDNAP, sizing, interlaboratory comparisons, 29
single-step extraction, bupivacaine, human plasma, *n*-hexane, gas chromatography, packed column, pharmacokinetic study, 125
sizing, EDNAP, single locus probes, interlaboratory comparisons, 29
sleep apnea, hypertrophy of the palatine tonsil, sudden infant death syndrome, 93
Spain, alcohol consumption, drug consumption, drivers, road safety, 221
spectrofluorophotometer, drowning, chlorophyll(a) of planktons, 149
statistics, DNA profiling, database, 45
stomach, postmortem interval, electrical resistance, resistance, gastric wall, 81
stress, child abuse, child neglect, thymus gland, thymic involution, T lymphocytes, immunohistochemistry, 69
subarachnoid haemorrhage, trauma, posterior inferior cerebellar artery rupture, posterior inferior cerebellar artery anatomy, 61

T lymphocytes, child abuse, child neglect, thymus gland, thymic involution, stress, immunohistochemistry, 69
test papers, semen, persumptive test, zinc, 131
testing strategy, semen, zinc test, acid phosphatase test, comparison, 135
thin layer chromatography, computer crimes, questioned documents, 51
thymic involution, child abuse, child neglect, thymus gland, stress, T lymphocytes, immunohistochemistry, 69
thymus gland, child abuse, child neglect, thymic involution, stress, T lymphocytes, immunohistochemistry, 69
timing of wounds, microspectrophotometer, nonspecific esterase, 203
torture, medical participation, validity assessment, documentation, 97
trauma, posterior inferior cerebellar artery rupture, posterior inferior cerebellar artery anatomy, subarachnoid haemorrhage, 61

validity assessment, torture, medical participation, documentation, 97

writing characteristics, signatures, fiber tip pens, 157

zinc, semen, persumptive test, test papers, 131
zinc test, semen, acid phosphatase test, comparison, testing strategy, 135
